1. Applicant's election of the invention of Group 1, claims 1-43 in the reply filed on Nov. 7, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The restriction requirement is made final.

3. Claims 44-62 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on Nov. 7, 2005.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-9, 14-20, 25-32 and 37-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Brovold US 6,026,692.

Note abstract and Figs. 2 and 4-8 and col. 10, lines 1-17. Note the load cell wire implies pressure monitoring. The system appears to include components that can be considered as constructed and acting as set forth.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show gyratory compactor testers.

7. Claims 10-13, 21-24 and 33-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
